Concert Program Includes Request Numbers of Past

Celebrating in Silver Jubilee, the University Orchestra is giving a concert in honor of the 25th year of its existence in its regular concert at the college. Under the direction of Dr. Charles A. Keeler, the orchestra, which is made up of 18 members, is one of the oldest of its kind in the country and is distributed throughout the college. The concert will be held in the auditorium at 8 p.m. on Thursday, May 13. The program will consist of a variety of music ranging from classical to popular, including works by composers such as Beethoven, Mozart, and Brahms.

Eighteen Students

The ceremony will be attended by 18 members, one of whom is the “stalwart” of the orchestra, who has been a member for 25 years. During the course of the year, the orchestra has performed at a wide variety of events, including concerts, recitals, and community events. The orchestra is well-known for its high level of performance and has been invited to perform at numerous festivals and conferences.

Leach Carries On Annual Tradition

Dickson’s “Christmas Carol” will be given for the fifth consecutive year on the campus of Wooster College. The performance, which was first presented in 1913, has become an annual tradition for the students and alumni of the college.

M.S.G.A. Selects Student Patrons

The M.S.G.A. has selected a number of students to serve as “Student Patrons” for the current academic year. The students, who will be responsible for planning and执行 of student events, were chosen by a committee of faculty members and student leaders.

Westminster Choir Presents Messiah

Handel’s “Messiah” will be performed by the Westminster Choir, under the direction of Dr. John R. Macdowell, on Thursday, December 12, at 7:30 p.m. in the auditorium. The performance will feature a large orchestra and a talented chorus, and is sure to be a highlight of the holiday season.

Y. W. C. A. Gives Holiday Party For Poor Children

Y. W. C. A. will give a party for underprivileged children in Hillhouse. The event will be held on December 14 at 11:00 a.m. in Gossen, presenting 80 children with presents and opportunities to play games. The event is sponsored by the Y. W. C. A. and is part of the Christmas party’s family fun.

Lewis Wins Prize For "Hop" Script

A script of over $500 was given by the Y. W. C. A. to M. G. B. for "Hop, Skip and Jump," which won first prize in the Y. W. C. A. competition. The script was written by M. G. B. and will be performed in a children’s play to be presented by the Y. W. C. A.

Miss Dilling Appears In Co-op Concert

Dilling’s "Christmas Carol" will be given for the fifth consecutive year on the campus of Wooster College. The performance, which was first presented in 1913, has become an annual tradition for the students and alumni of the college.

All College-ites Will Swing and Sway In Formal Dance to Laura Grayson

Students Complete Courses in Flying

The general requirement for the C. E. degree is that students obtain 32 semester hours of courses in science and 16 semester hours of courses in engineering. In order to fulfill this requirement, students must take courses in mathematics, physics, and chemistry, as well as a variety of engineering courses.

Students May Vote in 48 States by 1944

The first primary election for which students may vote is scheduled for 1944, and it is expected that by that time, students will be able to vote in all 48 states.

N. Y. A. P. Ends

The N.Y.A. program was initiated in 1933 to provide employment for young men and women who were unable to find work. The program was funded by the government and provided work for over 5 million young people across the country. The program was撤销 in 1943 due to the end of the war.
After a vacation of several weeks, because of Thanksgiving and Week, I have been able to find time to play a few rounds of golf. But I must take a deep breath and begin.

The talk of the town and the subject of the Radio Club is the Alvarez robot. An inquisitive robot, which this month has been living in the world of radio. The robot is a beautiful machine, with a brain of its own. It has been invented by many members of the student body that sections are delegating to the Radio Club.

The robotic brain is made up of a series of lights and switches that are connected to the various circuits of the robot. The lights are used to indicate the thinking process, while the switches are used to control the movements of the robot.

The brain is connected to the body of the robot, which consists of a series of mechanical parts. These parts are designed to perform specific tasks, such as moving the robot's arms or opening and closing its mouth.

The robot is programmed to perform a variety of tasks, such as answering questions, playing games, and even telling jokes. It is an impressive display of artificial intelligence and has already proven to be a popular attraction.

The creation of the robot marks a significant step forward in the field of artificial intelligence. It is a testament to the ingenuity and creativity of the student body and serves as a reminder of the potential of technology to improve our lives.

One of the little 21st-century "Pebble Books" recently published in Henry Van Loon's story of America is "The President's Speeches." This peculiar book is quite fascinating. It contains one of the most interesting speeches ever made by a U.S. President. In it, Woodrow Wilson spoke of the British Prime Minister, Mr. Lloyd George, and the American President, Mr. Taft.

The speech was given in December, 1899, and it is a striking example of Wilson's eloquence. He spoke of the importance of peace and the need for国际合作. He made it clear that the United States should not be drawn into any war, but rather should work towards a just and lasting peace.

The speech is available in the new edition of "The President's Speeches," and I highly recommend it to anyone interested in American history.
