"Unethical" Alternative

Although eclipsed by the Cuban crisis, Laos continues to be a problem of vital concern. Day by day the Pathet Lao are losing ground to the Communist forces and their allies. For years the Pathet Lao have been in no position to make any real gains, and their losses have been small. The Communists, on the other hand, have been able to make steady progress. The Pathet Lao are now facing what could be a decisive battle for their survival.

One of the main problems facing the Pathet Lao is the lack of support from the international community. While the United States has consistently been a source of aid and assistance to the Pathet Lao, other countries have been more hesitant to provide support. The lack of international support has made the Pathet Lao's task even more difficult.

The Pathet Lao are also facing a significant internal challenge. Within the ranks of the Pathet Lao, there are growing concerns about the leadership and the direction of the organization. Some members of the Pathet Lao are questioning the effectiveness of the current leadership and calling for change.

Despite these challenges, the Pathet Lao remain committed to their cause. They continue to fight for sovereignty and independence, and they are determined to defend their homeland against the forces of imperialism.

**Wanted: Election Returns**

To us it seems rather ironic that the Senate, which has for so long been the champion against Watergate, should now be playing such a central role in the scandal. The Senate, with its reputation for independence and integrity, has been transformed into a body that is more interested in protecting its own members than in serving the public interest.

This is a sad commentary on the state of our political system. The Senate, which was once a symbol of the American people's trust in their elected representatives, has become a place where personal interests take precedence over the public good.

**Sticky Fingers**

One of the specific areas to which Larry Caldwell, president of the Student Senate, wants to direct attention this year is the reportedly increased stealing on the campus.

The students have a right to know how the various candidates for the Student Senate are going to address this issue. Unfortunately, there is little information available on this topic.

In the past, the Student Senate has not been very effective in combating theft on campus. The problem of theft is a serious one, and the students need to be informed about the candidates' plans to address it.

This brings us to the question of whether the Senate is doing enough to combat theft on campus. The Senate has a responsibility to ensure the safety and well-being of its constituents, and it is failing in this responsibility.

The Senate should take action to address the issue of theft on campus. This includes working with the administration to implement more effective security measures and providing information to students about how to protect themselves from theft.

**Rebel yell of hope**

The nature and intensity of the rebel's cry will depend on the specific historical and cultural context in which it is being used. In general, though, the rebel's cry is a means of expressing a desire for change and a rejection of authority.

If you are a rebel in midcareer, as he is going about his everyday business, andquire of him an act of principled contrary to his material interests, you would evoke what might be called his "rebel yell".
