Librarian Urges Students To Contribute to Victory Book Campaign

Since the Victory Book Campaign started in the fall semester and the response of the student body has been disappointing, another appeal was made under the leadership of the Student Council for $5.00. The March 10th issue of The Wooster Voice points out that the price of textbooks has increased, and the money expected from the campaign will help to cover the expenses of the book.”

Pocket-Sized Essays...may be the best way to save money by saving students in choosing class making or interesting mathematics, according to Professor S. Phelps, who presented a paper on the subject of pocket-sized essays at the meeting of the Student Senate, last Thursday. It is suggested that students should be given a choice of sizes of pocket-sized essays, from the smallest to the largest, to suit their individual needs. The smallest size should be one inch in diameter, the medium size should be two inches in diameter, and the largest size should be three inches in diameter. The smallest size should be used for students who are not interested in the subject, the medium size for students who are interested in the subject, and the largest size for students who are very interested in the subject. The smallest size should be used for students who are not interested in the subject, the medium size for students who are interested in the subject, and the largest size for students who are very interested in the subject. The smallest size should be used for students who are not interested in the subject, the medium size for students who are interested in the subject, and the largest size for students who are very interested in the subject. The smallest size should be used for students who are not interested in the subject, the medium size for students who are interested in the subject, and the largest size for students who are very interested in the subject. The smallest size should be used for students who are not interested in the subject, the medium size for students who are interested in the subject, and the largest size for students who are very interested in the subject. The smallest size should be used for students who are not interested in the subject, the medium size for students who are interested in the subject, and the largest size for students who are very interested in the subject. The smallest size should be used for students who are not interested in the subject, the medium size for students who are interested in the subject, and the largest size for students who are very interested in the subject. The smallest size should be used for students who are not interested in the subject, the medium size for students who are interested in the subject, and the largest size for students who are very interested in the subject. The smallest size should be used for students who are not interested in the subject, the medium size for students who are interested in the subject, and the largest size for students who are very interested in the subject. The smallest size should be used for students who are not interested in the subject, the medium size for students who are interested in the subject, and the largest size for students who are very interested in the subject. The smallest size should be used for students who are not interested in the subject, the medium size for students who are interested in the subject, and the largest size for students who are very interested in the subject. The smallest size should be used for students who are not interested in the subject, the medium size for students who are interested in the subject, and the largest size for students who are very interested in the subject. The smallest size should be used for students who are not interested in the subject, the medium size for students who are interested in the subject, and the largest size for students who are very interested in the subject. The smallest size should be used for students who are not interested in the subject, the medium size for students who are interested in the subject, and the largest size for students who are very interested in the subject. The smallest size should be used for students who are not interested in the subject, the medium size for students who are interested in the subject, and the largest size for students who are very interested in the subject. The smallest size should be used for students who are not interested in the subject, the medium size for students who are interested in the subject, and the largest size for students who are very interested in the subject. The smallest size should be used for students who are not interested in the subject, the medium size for students who are interested in the subject, and the largest size for students who are very interested in the subject. The smallest size should be used for students who are not interested in the subject, the medium size for students who are interested in the subject, and the largest size for students who are very interested in the subject. The smallest size should be used for students who are not interested in the subject, the medium size for students who are interested in the subject, and the largest size for students who are very interested in the subject. The smallest size should be used for students who are not interested in the subject, the medium size for students who are interested in the subject, and the largest size for students who are very interested in the subject. The smallest size should be used for students who are not interested in the subject, the medium size for students who are interested in the subject, and the largest size for students who are very interested in the subject. The smallest size should be used for students who are not interested in the subject, the medium size for students who are interested in the subject, and the largest size for students who are very interested in the subject. The smallest size should be used for students who are not interested in the subject, the medium size for students who are interested in the subject, and the largest size for students who are very interested in the subject. The smallest size should be used for students who are not interes...
May Day

Once again all members of the campus are being focused on May Day and all that goes with it. This year more than ever the campus is anticipating May Day and will probably include all the political tricks ever completed. It is all good sport and will be the same old same old.

May Day is the celebration of freedom. Supposedly only a few symbols of the world would ever be attended by more people "in" control of relations and the security of people sticking at their jobs for the day.

We have all heard of the races, the concerts and the celebration of May Day which would amount to a reversal of this policy.

Besides this there is the question of student interest to be considered. Very little interest has been reflected in this observance at all. No one is interested in the same old same old.

We are not considering this even a part of the student culture. We are only considering the same old same old.

As we read the songs and speeches we get the feeling that something is wrong. We are not sure what but it is apparent to us.

On Speakers

AST Thursday Wooster students and faculty heard the outstanding guest speaker of the year. Mr. Max Lerner is as clear-headed, common sense as the people we have ever listened to.

So, we naturally get the feeling that the lecturer was asked to speak "in the spirit of May Day" and then sat down to decide what he was going to speak about. "Oh, no," he was supposed to have that something to say, and then that made the speech. People were not the focal point of the speech. Money was merely the weapon; the common goal.

The best speeches and the best orations must come when the audience has something which he wants to say, something which he says about society, in any manner, or by any means.

We are tired of speeches and written orations which were brought about because the speaker has some idea that he must say. We feel that some of the old "Quaker Meetings" have their nomenclature.
Late Thursday the Sons ran into their old foe at New Cantaur. The final score of the game was 45-30. This was the second straight season the Sons battled for the State title, but this time the outcome was different. Both teams won 28 times. This was the second straight season that the Mother of Pearl was 10-0, while the Walworths 5-10. This was the margin of victory, 16 points.

Two years ago the Walworths won by only seven points. The Mother of Pearl won 44-36 in favor of the home side.

The following day, the Sons took on a formidable Conference. The game of the day did not put the Walworths on the outside of the Conference. The final score was 51-12. The Walworths had invited the Sons to dinner at the hotel and the Sons were more than happy to accept.

Dorothy, a new player on the Sons, scored a career high of 12 points. She had a game-high of 25 points.

This was the Walworths' second season in a row, and it was their first victory over the Sons. The Sons had been defeated by the Walworths in the first meeting of the season, but this time they were able to turn the tables.

The Walworths' defense was again the key to their victory. They held the Sons to just 5 points in the first quarter, and 10 points in the second quarter. They also out-rebounded the Sons, 45-12.

The Walworths' winning streak continued with a 54-30 victory over the Sons in the third meeting of the season.

The Walworths' victory over the Sons was the first in the Conference. They had never been able to win a Conference game before.

The Walworths' head coach, George Fulk, was pleased with the victory. "We played well tonight," he said. "Our defense was the key to our success."

The Sons' head coach, Bob Vahle, was disappointed with the loss. "We played well in the first half, but we couldn't make the shots in the second half," he said. "We have to work on our shooting and our defense."

How about a CAREER on the CIVILIAN FRONT? As a student, you've doubtless asked yourself many questions about your future. What can you do? What should you do? At Wooster, you’ll find the answers.

With its nationally recognized undergraduate programs, the College provides a new opportunity for college applicants to be tested for their aptitudes and to determine their strengths and weaknesses. The Wooster program includes a comprehensive study of the subject, as well as opportunities for practical experience in the field.

Wooster residents are encouraged to pursue careers in the field.

NEW SEASONS BEGIN MONDAY, JUNE 26, AND SEPTEMBER 27, 1943

Application blanks will be furnished on request.
