Prospects for big entertainment funds limited by deficit

The prospects for Big Name entertainment at the Three Rivers Coliseum aren't looking very good. Larry Carter, City's director of Recreation, said yesterday that the money was spent on a staging and setup fee for a big-name act that's world famous. However, the act has been cancelled due to a change in the management of the act's booking agency. The fee was paid to the agency before the cancellation was announced.

No PE required

The revised curriculum is now in effect and students will no longer need to take a physical education course. The curriculum is divided into three parts: Health, Physical Education, and Social Studies. Each part is mandatory for all students, and the courses are designed to help students develop a well-rounded education.

The updated version of the curriculum includes new courses in the fields of science, mathematics, and social studies. The courses are designed to help students develop critical thinking skills and prepare them for college.

A second modification to the curriculum is the addition of a new course in environmental science. This course will help students understand the importance of environmental issues and develop strategies for protecting the planet.

The new edition of the curriculum is available on the college's website and in the college's student handbook. The college is also planning to offer a new online course in environmental science to accommodate students who cannot attend classes in person.

The college is proud to announce the availability of the new curriculum, designed to help students develop the skills and knowledge they need to succeed in the 21st century. The college is committed to providing a high-quality education to all of its students.
Drushal defines responsibilities of Council

Mr. Ronald Wilcox, Chmn
Campus Council
The College of Wooster
Wooster, Ohio 44691

Dear Ron:

Whenever students propose a new activity or a new privilege or the extension of some privilege already granted, questions inevitably arise of how responsibly students are acting within the current frame work. Specifically, questions are raised about adherence to the Code of Conduct and the Code of Academic Integrity, and corollary to this question is the one which asks how much responsibility Campus Council is assuming to provide continuing support for the Codes.

I believe the Council has made and continues to make a valuable contribution to the campus community in a wide variety of ways, I take no position at this time on the validity of the criticisms which I convey to you here, I simply feel that they are frequent enough to deserve the attention of campus: The criticism is that Council has not confronted this problem of its own and student responsibility with energy and creativity.

The Council appears to the critics to have taken the position in recent years that any life-style goes without regard for the welfare of the entire campus community or without sensitivity to the rights of members of the community. To some it appears that Council has lost sight of its original mission, to supervise programs, areas of study: instead of being an initiator of positive programs, it seems to be a reacting agent complying with most demands made upon it.

Somewhat related to the above is the issue of the nature of Council membership. The Council was originally conceived as a tripartite organization which acts in accordance with the expressed wishes of the three constituencies it represents, and from whom it derived much of its authority. Its concern was to be primarily with student-councils, for programs, and interests; but there was also early recognition that the value which the college would place on the representation of one constituency would necessarily affect the other two and that, therefore, open debate and decisions based on consensus would be vital.

Questions have been raised about how validly this tripartite input is worth while. But the critics have been more inclined to feel that the Administration members are too influential, that student members perceive the Council as basically a student organization, wherein the administration and faculty members should accede to student positions unless they can raise specific and even "legal" reasons why they should not; that most requests made of Council by students groups should be granted by Council not because there is positive reason for granting them, but because no one can find sufficient reason NOT to grant them.

These are some interesting philosophical questions. Again, I repeat that I am not accepting or rejecting the implications of criticism, I do feel, however, that concern over the health of the Council and its ability to accomplish its programs might be enhanced by some exploration of these issues. I hope that an opportunity for me to do this with you can be arranged at an early date.

Very sincerely yours,
J. Garber Drushal

SGA should assume some of Council's roles

To the campus community:

It has come to our attention that certain criticisms have arisen concerning administration attitudes and activities in the past few months. Galpin has traditionally had the power to determine the makeup of the student community, as well as its rules and regulations over which the Council conducts their day-to-day social activities. Many students feel that they should have more of an active voice in the determination of the rules and regulations.

In its vain attempts to create progressive legislation for the improvement of the students' social environment, Campus Council has been stymied by an inability to reach student groups should be granted by Council not because there is reason for granting them, but because no one can find sufficient reason. Furthermore, the president's veto power effectively negates Council legislative abilities. The president seems unwilling to attend Council meetings and, unfortunately, communication or crual issues is not always best with the eyes and frustration.

Council is further limited by its over-cautiousness in terms of rendering student wishes on the approval proposals. Large delays caused by the unnecessary tabling of student group petitioned student desires, pointless debates concerning minor issues within the student group, over-concern with legal and quasi-legal considerations and the threat of final rejection of the petitioned student desires. The Student Government Association General Assembly is filled with the most representative student group on campus, is granted a very limited tool for expression of student desires.

The Student Government Association General Assembly, ined, instructed the most representative student group on campus, is granted a very limited tool for expression of student desires.

The crediblity gap which exists at present between the general and student members of the community is increased by the current regulation under which the president's veto power and Galpin's seeming evasiveness in supporting the true reasons for such actions.

It has often been suggested that the administrative prime concern in both accepting students for admission to the College and the regulation of their academic and social lives is not motivated by an interest in improving the quality of life on campus, but rather by economic interests. Some students claim that the primary motivation of the administration is the disposal of all admission quotas and solicits larger contributions from alumni, and not the development of an imaginative and creative community life.

It has been further suggested that the lack of interest in using intramural student, faculty and administrative bureaucracies is ineffectual in promoting student needs, and, in fact, may be an efficient method by which the administration uses the students in order to control them.

I think the Council should be the overseers of the college. The power to veto would remain theirs, but it would be simply hoped that this power would be used wisely and sparingly. For all time to come, the only significant input of data to the trustees should be a bilateral, self-serving opinions by the council and director of administration. Since the College is entrusted to the trustees, it is up to the trustees to take particular pains to
The Reel World

David Lean snows audience with 'Dr. Zhivago'

By Bob Hetherington

I can no longer sit passively and listen to a crowd of snow-blinded movie patrons gush over the virtues of David Lean's DR. ZHIVAGO, though I am by no means one of the worst pictures ever made, it is by far one of the least interesting. To be sure, compared to the galaxy of consumptive banter that hit the Mateer picture palace the previous weekend, the average movie goer will consider this big name entertainment, and that is something you don't often hear about on our campus. But viewed objectively, DR. ZHIVAGO must be labeled one big snow job.

In some respects the film has distinctions that justify David Lean's artistic cache. There are some remarkable performances; there are incidents of high drama and moments of exquisite beauty—whether they come in a panoramic snowbound 'horizons', a micro-scopomorphic examination of the steller wonderland found on a frosted window pane, or an intimate understanding of the standing of the horror of war on an old woman's face, or an old man's reflecting on his wife's death. In Mr. Lean's forest of spectacle there are some lovely trees, but we are at a loss with the implication that he never took a good look at the forest he had created, a spectacular soap opera. I, for one, shouldn't have been the least bit surprised to see the epic end by announcing that Strelnikov survived to live in England with the name of David Copperfield dawing out of incredible coincidences in Russia, and for the camera to zero in on Rina Tush-ingham's balalaika long enough to see Rosalind printed there. Instead, the director is equally appropriate by finishing with a shot of a rainbow, for we all know that everyone lived happily ever after in Stalinit Russia.

For the record, let us respect the solemnity of the filming of the Boris Fasternak novel by mentioning the screenplay. I trust that you have all heard of the book, and may even have it on your shelf, but never quite got around to reading it. If my suspicions are correct, Lean and Robert Bolt could have thrown away any old plot on the screen from a TAPE OF TWO CITIES to THE THIRD REICH and seen the plot of this novel is not so much the plot, as the extravagant expression of its emotions in poetic language. The poetry and torment make the moral hero compelling. The theme from his muse, Dylan Thomas was just another drink. Similarly, with all the poetry taken out of the film, Zhivago's and the other philandering husband who cannot adjust to the Revolution, and I must admit, I was rather all the bother dramatically, save for the breathtaking photography, there is nothing to hold the movie together—not the idea, not a feeling, not a plot—and the cast must struggle helplessly with Bolt's dreary expedition, or uninspired drive, while the film plods along to a three-hour boredom. For the daffodil snow and talk of the Party and the Workers is going to cover up so fundamental a failure of design.

As for the acting, Julie Christie is beautiful as always, Geraldine Chaplin emerges with some of her mother's good looks but none of her father's talents, and normally reliable performers like Rod Steiger, Alec Guinness, and Tom Courtenay play with intelligence and sometimes inspiration. The only one who-sheds his big cocker spaniel eyes, there is not much to say about Omar Sharif's performance. As Zhivago, his tortured soul seems to be suffering from severe Repetition-Balalakas, whereby a character finds himself unable to walk out of a camera shot unless prompted by tiresome cliches played on a scored instrument of unspecified origin.

One final note, Sitting in Mateer for over three hours with potential boredom guilt and something akin to Zhivago's train trip across the motherland, except he didn't have to watch the movie.

Dayton's 'All American Boy' makes good LP

by Chip Freeman

This album could be titled 'Who's that Cute Little Kid Behind the Fender,' or possibly, 'The Sex Life of a Midget from Dayton, Ohio,'...several out of the cut ones pass on highlights of various love affairs. But that's only one reason why I enjoy Rick Derringer's inaugural solo album, ALL AMERICAN BOY. And just because I'm from Dayton and used to go see the kid play with "Rick and the Recliners" Gater the Mc-Cay's of 'Hang on Sloopy' fame) doesn't mean I'm biased.

ALL AMERICAN BOY is a very enjoyable album loaded with good rock and roll and several musical twists. The album opens up with the immortal "Rock of the South (Under the Flag of the United States)"...a song that is typically produced with a lot of strings, tears and memories. The plot of this song is questionable, as Rick and his like rock and roll drive down a lovely gravel road on their way to their final moments of love.

One tune I am particularly fond of is "Teenage Love Affair"...one that makes a hell of sense words-wise, but makes a touching song.

I might stress that this album is not exactly lyrically provocative, but ALL AMERICAN BOY is a party album and at the same time fun to listen to.

To the Editor:
I would like to respond to Mr. Willke's in absentia "challenge" with the caution that his research and expertise on "human life" in the womb is as second hand and inaccurate as his assertions and accusations in his letter last week, then it would be important to listen to him (when he comes to Wooster) with all your critical faculties.

The first inaccuracy is his false "overstatement" that I am one of "the best known pro-abortion propagandists in the U.S." I am not pro-abortion and never have been, but what I am a propagandist for the FREEDOM OF CHOICE of a woman to decide whether she will have a baby or not. Mr. Willke, whose skill in verbal and emotional overkill is exceeded only by his modesty, states that he has written "the most widely read pro-life book in the world," but Kidder's information falsely told him that I had written a critique of his book on abortion and had sent it to him. I hope that his "scientific journalists" who quotes in his book on which he bases his case are more reliable than his second-hand information. I reported on my meeting in Wooster, Mr. Willke doesn't refer to himself as a "propagandist" but simply as a "Prolife speaker." The implication being that those who disagree with him are continued on page five
**Student fast proposed to aid Ethiopia**

by Mike McKeon

"For over five years a large portion of Africa has suffered a devastating drought. As a result, well over one million Africans and 80% of the affected region's livestock are dead. The West African drought is one of the worst natural calamities in recorded history." So said a proposal presented to SCA at the weekly meeting held Monday night at 7:00. The proposal outlined a plan to help save lives in the drought-stricken areas, specifically Ethiopia.

The plan, drafted by the Drought Relief Committee, proposes that a student fast day be held sometime in February. The fast will be strictly voluntary and will serve two functions:

1. As an expression of identification with the hungry of the world.
2. As a means of raising money.

The committee proposes that whatever money is saved by Food Service as a result of the fast will be turned over to the relief fund. To facilitate the drive, students participating in the fast will have to make known their intentions to fast and waive in writing their right tobonus.

Names and ID numbers will then be turned over to Food Service in order to reduce food orders that day and thus effect a saving. The relief committee also states that Food Service requires at least 10 days time possible between the declaration of the fast and the actual fast. It is to be started the first weekend of the week.

It is necessary to expedite the plan, because the fast was going on a Chode, spokesmen for the Drought Committee, if they had approached Food Service about the idea, Chode said they had not because they wanted to secure SCA's endorsement first. Maloney then asked what the money would be used for. Chode said the money would be used to buy food and medicine to transport hungry people from the rural areas to the cities.

Charles Shollenberger moved to give the Ethiopia Relief Fund $1,000. Bill Andeen seconded the motion. Objectors were raised to allocating such a large sum of money. It was felt that SCA would find out what student opinions were concerning this matter. A motion to table the fund allocation until the next meeting was approved 8-2-1. President John Kneen said the matter would be the first order of business on next week's agenda.

A motion was then made by Bill Andeen to end today. Student Fast Proposal. Chuck Ferguson seconded the motion passed 11-0-1. The Drought Relief Committee now needs administration as well as Food Service approval to implement the plan. The student fast is only a part of the program. The Drought Relief Committee is working on it. It has initiated a program of public education in Wooster, beginning with the College. It hopes to encourage local representatives to introduce legislation which would fund the drought victims. The committee also hopes to raise money by selling various items, including the drought-stricken parts of Ethiopia are learning well the meaning of the word starvation as they see the thin, gaunt faces of the adults, as they count without difficulty the ribs of the children, as they smell the carcasses of the dead animals which litter the streets. Young people have become ten-year-old children look like babies of three months, and babies are mere skeletons, once fit people are now carried on the backs of the fitter ones, old people lie and wait, hope, and pray that someone will sometime bring food. Death has become a common thing as hundreds die monthly from malnutrition and associated diseases, so common, that the problem is who is able to bury the dead? The body of a boy lay in a street for four days before he was buried, in one town cattle are dying at the rate of 30-40 per day, meaning a great loss to the owners, but to the starving, food, as the people tear off the meat from the dead animals and eat it then and there regardless of whether the animal died from starvation alone or from disease." Quote from CHRISTIAN FAMINE REPORT.

**Admissions not lowering standards**

by Sue Tew

"Right now things look very good," said Byron Morris, director of admissions here at the College. He referred to Wooster's situation in the face of the energy crunch and the low enrollment many small schools have been encountering. The high point for applications was three years ago.

When asked whether he thought the admissions office was lowering its standards, Morris said he thought the standards are not declining. "We only admit those we think will make it," he explained. However, risky students are admitted and "our batting average with them has been very high," said Steve, Graff, Associate Director of Admissions, indicating that a student with a SAT score below 400, in this year's freshman class, 25 percent of these risk students obtained a 2.0 after the first quarter but, 53 percent made over 2.5 and 12.5 percent made over 3.0.

When admitting students, the admissions department considers more than just SAT scores. High school grades, class rank, and the reputation of the high school is also taken into account. A good risk student would be a student with a high class rank and low SAT scores. The average student here had a 540 verbal and a 565 math score on the SAT's. This is 100 points above the national average, Graff said.

When questioned about the enrollment of children of alumni and family, Morris said, "We bend over backwards to help them." "We ought to give them a chance if we can," continued Graff. "We try to be more considerate of our own." "However, we do not mean a student with no previous connections would be discriminated against. "There are always places for a good student, even after April or May," said Morris.
Spock impressed by Chinese 'serenity'

continued from page one

could see no sign of honesty, de-
cency, or "knowledge of what's going on" in the President, earlier, at the press conference, Spock spoke at some length on the question of impeachment, saying, "Why does anyone doubt that the President himself has been, or can be, impeached?" He suggested that even if Nixon personally could not be impeached due to some crime, he should be held responsible for the illegal acts of his administration. He asserted that impeachment would be meant by the framers of the constitution to be not only a form of trial for crime, but a means to "keep a bridle" on a President unsatisfactory in any way. He said that he was "terribly disgusted" with the apparent timidity or timeliness of the great and wondered whether it is Congress's own corruption that is making them tolerant of Nixon. He added that he was "not nearly discouraged enough to doubt the ability of the nation to attain impeachment if it feels that impeachment would be a healthy event for the nation rather than the reverse." Speaking about China during the pit stop and main address, Spock did not claim to have gained understanding of all aspects of Chinese society during his stay of only a week, "it was mainly interested in the children." He suggested that since this was "the greatest and most interesting" group of people in China "critically but sympathetically," admitting that much in Chinese society is "unreadable" to our society, but looking for "good points" that might be adapted to our culture, most impressed him, he said, about Chinese society in general and Chinese child care in particular, was the emphasis of "general serenity and apparent contentedness." It was something, he said, that was "barely heard in the city" and "was never discouraged in the U.S., the atmosphere of aggressiveness, discontent, and "till nurture"; he noticed particularly how much American parents tend to yell at or hit their children, something he did not see done in China.

Spock praised the Chinese medical care system, which has vastly increased the care available to the people by combining traditional Chinese medicine with scientific medicine and by training "assistant doctors" and "barefoot doctors," who have been trained in first aid and other simple medical care) to supplement the regular doctors available, he reported that when he went to China he had been resolved to be one American "not comfortable with acupuncture," but he couldn't help seeing some of it because it was going on even a couple of high school students were practicing acupuncture on each other to cure sore throats.

He also praised the expanded Chinese educational system, alt-

though he commented that so far the Chinese use "old-fashioned" methods that leave little room for developing originality or creativity in children. His comments on this were "..chilly up my spine" and, got a similar reaction from American college students and after spending a week in China he learned that no Chinese student can decide for himself to attend a university, nor can he change his major. All students go to high school and go to work for several years. Eventually they may have to return to work if they find they are not suited for what they want to do. Spock was rather surprised to discover that, he had lived in China, "I couldn't have decided to go to medical school."

Spock also visited North Viet-

nam, the country whose "economic and medical system to be parallel to China's" and in many ways different in others. He found the North Vietnamese people to be "friendly, simple, and responsive"—something of a contrast to the more reserved Chinese.

He was taken to the Bach Mai hospital in North Vietnam, hit by U.S. bombs, and destroyed and disgusted by the apparent "systematic destruction" of the hospital complex. But, he said, the North Vietnamese had found ingenuous ways to evade American attempts at destruction; building a new hospital was destroyed and whole cities wiped out, but generally the people were saved and provided for.

Looking his ideas on China to

Moody advocates freedom of choice

continued from page three

"anti-life". What he does not say is that what he really is for is a compulsory system. He is not hearing us people we have to use in which unwilling women are forced to have unwanted children. Mr. Wilke is only interested in "when life begins in the womb" but I'm more interested in the freedom of choice and conscience end in society, I hope the stu-
dents of Wooster will hear Mr. Wilke out and decide for themselves whether his "anti-life" statement and the absolutist claims are simply "pro-life," or a fanatically moralistic, and legalistic statement of existence that "proves" all his opposition are "propagandists" and "fanatics."

I would be less honest if I said I am sorry I was not in the West Gate but Wilke's challenge, but if I were I would try to find out how his methods have been on all the anti-life forces and events that have been destroying children. Young men over the past decades,

Sincerely yours,

Dr. Howard Moody
Cagers upset Muskies 65-60; Stoll stars

by Ned Loughridge

Fighting Scots charged onto the floor of Timken Gymnasium Saturday night with fire in their eyes and emerged an hour and a half later with a big 65-60 win over Muskingum, knocking the Muskies out of first place in the Ohio Athletic Conference.

Wooster stormed to a 10-4 lead at the 12:38 mark of the first half on the superb shooting of senior Mike Stoll, who started his first game since the first game of the Wooster Classic, Stoll hit six of those first 10 Wooster points and set the pace for the rest of the Scot team.

Muskies battled back into the game in the first half and tied the contest 14-14, at the 8:39 mark. Sellers put the Scots ahead for good at 17:1 with a driving lay-up from the right side. Sellers and Stoll shared floor time in the Muskie game and at times the two point men were in the game at the same time with Scot offense going to wing.

The Wooster defense tightened, allowing the Muskies nine points in the remainder of the half, while the offensive play of Stoll, John Dorko, and Jeff Requarth built the Scots an eight point advantage at the half, 31-23.

The Muskies, led by 5-8 Little All-American Gene Ford of Midview, turned the game into a real barnburner in the second half, Wooster increased their lead to nine, 45-46, with 1:28 remaining, but then Muskingum rattled off six straight points to close the Scot margin to three, 45-48, at the 4:48 mark. Wooster held between a three and five point advantage the rest of the way. With the score 50-56, and less than three minutes to play, Woo- ster came out in a slowdown offense. The Scots held the ball for over a minute until with 1:30 remaining Sellers was fouled by Tim Gebhardt of Bucyrus. Sellers calmly hit both free tosses and it looked as if the Scots lead was secure. The Muskies brought the ball down the floor and quickly surrendered it to Wooster. It then looked hopeless for Muskingum, but Ford came from nowhere to steal the ball from Sellers and charged down the floor for what appeared to be an easy lay-up. Exemplifying the inspired Scot play was Gene Schindewolf who raced down the floor to block Ford's shot from behind. The ball bounded off the playing floor. It was ruled no have hit Ford, and the ball went over to Wooster. The last Muskingum hope had failed and a minute and eighteen seconds later the game ended.

Fans at the game were treated to a most impressive shooting exhibition. Wooster hit 56% (28-50) of their action shots and the Muskies burned the nets on 66.7% (28-43) of their tries.

Mike Stoll led the Wooster blitkrieg, hitting 10 of 18 shots and ending the night with 20. Dave Sellers came off the bench to connect on 5 of 6 and 2 of 3 from the foul line also, hitting 87.5% (7-8) while the Muskies connected on 87.1% (4-5). Wooster grabbed 22 rebounds to 13 for Muskingum and the Muskies had 13 turnovers to 10 for the Fighting Scots.
Scotties drop 60-31 decision

by Janet Smelts

Whatever it takes to beat Ohio University — speed, superior skills, or just plain luck — the College of Wooster women's basketball teams didn't have it last Saturday. Both junior and senior varsity teams were overwhelmed by the "Big Green", the J.V., losing 61-12 and the varsity falling 60-31.

A look at game statistics will tell the story on the junior varsity game, Ohio University controlled the rebounding, taking 64 rebounds to Wooster's 25. Consistency paid off for the O.U. team, as they attempted 79 shots from the field to a paltry 39 for Wooster. The Wooster women were just completely outplayed in this game. The statistics never gave up enough at all, though, for a decision and they were still settling up the offense to try and score. Even a tight defense couldn't make a dent in the O.U. drive — the victors were shooting and scoring with authority from everywhere.

Senior co-captain Patricia Vital and freshman Lisa Holbrook were a big boost to the J.V. effort. Pat lead in scoring and rebounding, while Lisa's hustle and tremendous effort set the example for the 100% all-out attempts of the whole team. Injuries have begun to harass the J.V.ers, as sophomore Meg Meakins suffered a dislocated left shoulder in practice last week and is out of action for the rest of the season. Laurie Priest is nursing a sore Achilles' tendon, but was able to play Saturday and score on a foul shot.

The first and fourth quarters were Wooster's best, as the team was temporarily able to find the momentum they have been looking for this season. Saturday was a day of instruction for the Scotties, as they found themselves witnesses to the overpowering drive of the Ohio University team. More game experience will be the key to the further development of the Wooster teams; Wooster has what it takes to be effective and to win, but the task now is how to put all the team's talent together and get the Scotties playing at the level they are capable of. Tomorrow's game will be a good test of the Scotties' skills. First jump is at 8:30.

Wooster opens track season at Denison

by Debbie Downes

Last Saturday the College of Wooster track team met Denison at Denison in its opening meet. Despite injuries and lack of field events the Scots fared reasonably well. Denison, however, proved to be too much for Wooster; the team still managed four first places.

For being so early in the season head coach Tom Kaiser was very pleased with the performances of Forrest Merton, Scott MacDonald, Rick Day, and Tony Alford. Forrest Merton took first place in both the 600 yard dash (3:54.5) and the 1000 yard run (2:35.0). Scott MacDonald's first indoor mile was a winning time of 4:31.2, Rick Day's first two mile indoor event took an easy 8:37.0. Tony Alford contributed in scoring for the Scots in the long jump with an 18' 4.5" third place. Two ineligible runners, Glenn Toothman and Freddie Jones, were also impressive in the races.

Other members of the College of Wooster track team include sprinters Mark Reiman, Reggie Holder, Mark Seker, and captains Ron Cotovich and Paul Reiman; distance runners Kim Ut, weight men Troy Schmidt and Gary Maxwell; assistant coach Rod Russell, student assistant coach Roy Bilgetta, and managers Deb Downes and Rita Thomas.

The Scottish Sue Hughes (15), Evelyn Campbell and Ann Baird (23) in last Saturday's game.

Injuries are a problem for the barriers this season with Forrest Merton, Mark Reiman, Kim Ut, Ron Cotovich, Scott MacDonald, Mark Seker and Troy Schmidt not up to form and Paul Reiman and Reggie Holder coming off knee surgery.

The team also participated in the prestigious Knights of Columbus track meet that night. Running the mile relay were Scott MacDonald, Rick Day, Tony Alford, and Kim Ut (alternate for injured Forrest Merton). Coach Kaiser commented that at the Denison meet Denison controlled the sprint events but Wooster controlled the middle and distance races. The type of spirit the members display is what is holding the team together, he added. Commenting on the upcoming O.A.C. meet at Denison, February 10, he said, "If we are healthier and lacking injuries we should do well at the O.A.C.'s."

Scotties top Scot grappers

The Scot grappers suffered two defeats last Saturday, one to host Ohio Wesleyan 26-30 and one to Hiram 34-24.

The Scot standout for the day was captain Wes Dumas who won both of his matches, one by a

pt and one by an overwhelming decision. Freshman Chuck Snyder suffered his first loss of the season at the hands of Hiram's Keith Fabritzi but pinned his other opponent, Ohio Wesleyan's Phil Wolfe.

Foy gets athletic, academic laurels

(NEWS SERVICES) — Linebacker Dave Foy has become the first player in the history of The College of Wooster to be named to the Academic All-America football team.

Foy, a senior from Wadsworth, was a first team College Division choice. In addition, he was the only player chosen from the Ohio Conference, Defensive back Mark Gulling of Ashland was the only other player from an Ohio college to be selected.

A first and second team were selected by ballots cast by members of the College Sports Information Directors of America. Foy is a chemistry major at the College and carries a 3.74 grade point average. He plans to enter medical school.

Dave came off a knee operation to win his fourth letter this past fall. He handled the defensive signal calling, led the team with 102 tackles in eight games, was nominated the team's outstanding line man and was one of the squad's tri-captains. He was invited to the OAC's All-North second team in a post-season poll of the league's coaches.

Coach Pat O'Brien was pleased by Foy's selection. He stated, "If I can say, in all honesty, that Dave has earned and richly deserves this high honor, He is the ideal student athlete."

Marietta trips cagers 63-59

By Ned Loughridge

"This team can't seem to sustain momentum, and I am not sure why," said Coach Al Van Wle, after his Scots dropped a 63-59 decision to the Marietta Pioneers before a sparse crowd at Timken Gymnasium Wednesday night.

The team was coming off a startling performance against league leading Muskingum, but did not look like the same squad as the Pioneers jumped out to an 18-6 at the 8:38 mark of the first half. Powering the Marietta attack was 6-8 freshman center Jeff Faloba, who gunned in 12 of those first 18 Pioneer points.

Wooster came storming back with eight straight points in the next three minutes to make the score 18-14. The rest of the half saw the Scots gain one more lead, only to watch the visitors, and Marietta led at halftime, 24-21.

Sparked by Faloba and 6-6 sophomore Art Clark Marietta again took to the Scots and opened up a fifteen point lead, 43-29, with 4:50 to play in the game. Wooster refused to give in however, and led by sharp shooting Tim Shetzer, began to work their way at the Pioneer defense.

At the 5:05 mark, Marietta big man Faloba fouled out with the Pioneers holding on to a 47-40 lead. Faloba left the game with 18 points and things were looking better for the Wooster fans.

But then junior guard Chuck Robinson went to work. The six footer from Chesterhill, O., controlled the ball for Marietta and was continually fouled by the Scots. Wooster sent Robinson to the foul line six times in the final five minutes and he responded by hitting 11 of 13 attempts. Seven more foul shots were made by freshman Allen White, and sophomores Clark and Mark Ryan to outlast the Scots comeback. Marietta did not make one field goal in the last five minutes.

Coach Van Wle commented after the game, "It was poor shooting, lack of patience and lack of poise that hurt us. We had two good comebacks. It wasn't lack of hustle or determination that hurt, We just didn't have the patience coming down the stretch."

The Dutchman continued, "They went to the foul line and made them, that was a big difference. They could have just as easily lost it at the foul line."

One bright spot for the Scots was the play of sophomore wing Tim Shetzer. Shetzer playing for the first time this year without a brace on his knee, hit 10 of 15 from the field and ended the game with a season high of 21 points. Said Van Wle, "Shetzer played his best game of the year."

O-W beats swimmers

by Paul Cope

The Ohio Wesleyan varsity swim team defeated Wooster Saturday, 70-53, Competition was closer than the final score indicates for many races were decided in the final ten yards.

Ted Hammond was a triple winner for the Scots. He captured first places in the 50 and 100 yard freestyles and was joined by Mike Cleary, Dale Os- terman, and Bob Stevens in the 400 yard freestyle relay. Stevens followed Hammond in the 50 and 100 yard races. The two new-comers have prevailed an important 1-2 punch in the Woo- ster attack this year.

The meet's most exciting race was the 300 yard individual medley.
