This Book is brought to you for free and open access by the "The Voice" Student Newspaper Collection at Open Works, a service of The College of Wooster Libraries. It has been accepted for inclusion in The Voice: 1971-1980 by an authorized administrator of Open Works. For more information, please contact openworks@wooster.edu.
Renovation may start next year

Town- gown project envisions new Wooster

by Jim Kliet

Two years ago a group of Wooster students illustrated what can happen when the college and the city pool their resources. A 399 level student-managed course was created to enable 18 students to attack the problem of Wooster's downtown area. Under the direction of Prof. Arnie Lewis of the Art Department and student Chris Mandel, the class drew up a realistic plan for the regeneration of Wooster's center-city district.

Students with common interests worked together within the group to attack specific problems. Several students conducted an attitude survey of local residents concerning the problems of the city. Other areas of specialized work included a study of transportation problems, parking problems, tree planting possibilities, photographing the city, model building, and designing of plans.

Thomas Ulh, Director of Administration for Wooster, worked with students on the project. Ulh instructed a seminar and endeavored to present the problems from the perspective of the city government.

At the conclusion of their project the students compiled their material in the form of a report. The completed report was received by the Wooster Chamber of Commerce in a student oral presentation. The model (8 feet by 8 feet) constructed by two of the students was presented to the Chamber.

One might ask what benefits have accrued from this project two years later. Through the work done by the students, the Chamber of Commerce underwent attitudinal reorganization. According to Kay Stewart, a project worker now employed by the city, the interest and optimism of the students seemed to engulf the Chamber, shortly following completion of the study positive action was instituted by the City and the Chamber to get the project moving.

The City contracted with a New York based firm of Alexander and Company to do a more extensive study. The City has presently committed itself to the proposed plan and looks forward to its implementation.

The remaining problems are getting the needed monies, most of which are available through urban renewal funds, and getting the final approval of the Chamber of Commerce. If everything goes well, the renovation and beautification of the downtown area should start next year.

Winter wilderness' program offered

by Corlame Rudman

Ten Wooster students recently applied to participate in Winter Wilderness "72, a GLC.C.A. program stationed in the Southwestern United States and sponsored by Earlham College in Richmond, Indiana.

The program, according to its directors Margaret Ledner and Ben Foster, "is aimed at the sophomore or junior level student with interests in experimental and/or outdoor education, field study in natural science, with introductory background in geology or biology. Dates for the program are January 6 through March 14 with the cost set at $1,500.00. Students who apply are expected to have done some back-packing while possessing an awareness of "the physical and psychological demands of a group back-packing experience," Prof. Berghold, campus coordinator for Winter Wilderness, estimated Earlham will choose from two to four Wooster students for the program, and these individuals will be notified of their acceptance within the next month.

Winter Wilderness offers a unique opportunity and the major motive is "a serious academic pursuit in the natural and social sciences. . .by direct contact with, and (am) opportunity to work within, the natural environment."

This venture combines both formal study and intensive field work in utilizing the resources of Southwestern America. The project covers a time span of ten weeks divided into five study segments: an introductory period at one of the participating colleges, travel west, the field period at two or three base areas (which makes up the bulk of the experience), the return trip east, and a one or two week utilization of resources at the home colleges.

Courses tied in with the actual

Downtown Wooster shows a blend of old and new. Owners will be encouraged to renovate old store fronts instead of completely modernizing.

Wooster: not quite as damp as you think

by Jeff Adair

Any theory that Wooster is at the intersection of seven different rain belts is all wet.

For that matter, is any idea that Wooster is the wettest spot in Ohio, getting more rainfall than any other part of the state, According to records of the National Weather Service, the average precipitation annually for Ohio is 34.47 inches, Wooster's average is 37.27 inches for the 85 years records have been kept at Wooster's Agricultural Research and Development Center here.

Some students at the College have complained about weather here saying there is too much rain. To support their claims, they remark that Wooster has had 44.31 inches for the same time," said Vaughn.

"The only way you can say weather is in belts is that it is seasonal and comes in cycles," remarked Ed Jacob, of the National Weather Service at Mansfield Lahm Airport and a Doctor of Meteorology at Ashland College. "Cycles come about every 100 years," he said.

According to Jacob, the Charles Mill Dam, built near Mansfield for flood control purposes by the Muskingum Watershed Conservancy District, was designed for only one flood every 150-500 years to go over the top. So far, the dam has not been flooded. It was built in the 1930's. Mansfield's average annual rainfall is slightly less than Wooster's at 35.67 inches. It has recently been revised from a 38.6 inch average, and that includes recent dry years according to Jacob.

"Thirty-seven inches is a good year in Wooster, but it is not in itself extraordinary average," said Jacob. "It is natural for some years to be higher and some lower, that is how we establish averages," he added.

The highest annual rainfall in Wooster since records have been kept was 51.39 inches recorded in 1958, and the lowest came in 1963 when 29.04 inches was measured for the year. In 1969 when there was a major flood isolating the community for several days, 41.35 inches was recorded at the agricultural center.

Other recent rainfall totals for Wooster and Wayne County include a 38.42 recorded in 1970, 26.79 in 1971, and a 41.77 in 1972. In 1979, 34.83 inches were measured, and to date this year, Wooster has 26.56 inches.

For those who prefer snow to rain, their season is just to come. Skiing and tobogganing enthusiasts can look forward to an average annual snowfall of 31.5 inches. Snowfall is included in the annual precipitation records, a 5 foot average for the year.

The 85 year average shows Wooster students can expect 0.3 inches of snow in October, 2.5 inches in November, 6.0 inches during December, and during winter quarter, 7.4 inches in January, 6.3 inches in February, 5.3 inches in March, followed by 1.5 inches in April.
**Letters to the Editor**

**Non-smoker’s manifesto**

To The Editor:

I am writing to you today as one of those silent majority that has been silent long enough. I am writing to you as a non-smoker who wants to get a fair shake.

For too long, those of us who do not smoke have had to put up with the inconveniences of those who insist on pursuing this senseless habit. I am describing it as I see it won’t do any good so I won’t go any further; most smokers know just exactly what they are doing to themselves and they figure it’s worth it. My appeal is not for their health, then, but for mine and the health and comfort of all other non-smokers.

1. The day has passed when smoking can be described as a social habit. The smell, and the smoke and the ashes have always bothered some people and the time has come for their health problems to be taken into account. Out of simple common courtesy, I would encourage the consideration of the following simple guidelines:

1. Teachers should take a vote at the beginning of every course to determine if smoking should be allowed in the class or discussion group. Since the ratio of smokers to those affected is uneven, an anti-smoking vote of 25% should be enough to ban it.

2. Smokers should use designated areas for smoking only because of fire hazards, availability of ashtrays and to give non-smokers some sanctuary.

Smokers should be more sensitive to other problems and ask those people in the immediate group if it bothers them if he/she smokes. Also, if someone asks him/her NOT to smoke, the smoker should be offended or act defensively.

3. Non-smokers should stand their ground as well, and tell those “suckers” how they really feel.

I realize my letter is rough on smokers, but it is nowhere nearly as obnoxious as a lungful of smoke in the face. A lot of non-smokers and ex-smokers appreciate every bit of fresh air around.

Sincerely,
Bob Seel

**Student sorry for Heidelberg halftime fiasco**

To The Editor:

I wish to express my sincerest apologies for the extreme rudeness which was shown by my band this past Saturday, October 19. I have rarely been so embarrassed. The Scotch band, the band which was, as usual, outstanding, Heidelberg’s band would have been wise to have remained off the field altogether.

During the second half and after the game I spoke to quite a few people. All of them were equally outraged at the rudeness shown by the best band in our conference. I hope that you will not allow the thoughtless actions of the inconsiderate fools to call themselves the “74 Homecoming Committee” to color your attitudes toward the school and its alumni.

Again, our sincerest apologies to your fine school and excellent band.

A Thoroughly Ashamed Heidelberg Student

**I.S. bus decision defended**

To The Editor:

In regards to the proposal put forth last week by the administration to use the I.S. bus to Cleveland was a discriminatory action by LCB, we of the Travel Committee make the following response:

1. As of 9:00 A.M., Fri., March 4, only 22 people were signed up for the I.S. bus. Running the bus at less than capacity would have left the Travel Committee with only $5 in its budget for the remainder of fall quarter. Having already scheduled another I-Strip and an Amish Tour, cancellation of the bus was the only financially feasible alternative.

**The ‘Boy’ in the ‘Butch’**

by Chuc

Or would Vietnamese and Panther suffering be put aside when offered a more basic bong—to join the live original who also oppressed of course when Americans in a brotherhood convened to prove each member capable of beating up a faggot?

I have seen what I have seen.

—Robin Morgan

"ANNUNCIATION (dedicated to the five men who beat up my friend)" (February 25, 1968)

The above segment of Robin Morgan’s ANNUNCIATION represents one of the few poems she has dedicated to men. The work is not a particularly flattering one, but the five “white working-class American men” referred to above were not particularly civil to Ms. Morgan’s so-called “faggot-bashers” (February 25, 1968, either.

It is no secret to anyone that violence has been a major tenet of male culture for quite a time. The victims of this cultural habit have at least been women, Blacks, and Gays as they have been straight white men themselves, Gloria Steinem, editor of MS, magazine, often makes the point in her public addresses that her first impression of men was one of stupidity: “I could never understand,” Steinem says, “why men in my neighborhood thought it was so MANLY to beat each other up in bars every Saturday night.”

As Gloria Steinem and others well know, men do not only beat each other up in bars, they are encouraged to annihilate each other through merciless competition everywhere from the battlefield to the classroom.

Will Phillip Slater be ON TIME when he states in his new book EARTHWALK that: “most of our social problems would cease to exist if we would stop rewarding people for creating them”? But exactly! The way our social system works, the more brute, butch, and brawny one exerts, the more HE is apt to succeed. The physical “bully” gets elected; the academically “bully” makes the Dean’s list, the physical “bully” is applauded on the football team, we pride people on their ability to ‘win’ while ignoring the class of ‘losers’ we create in their wake. We adore ambition, invulnerability, and power in our MEN, and then look dumberfounded at the vicious combination these traits produce: greed, indiscipline, defensiveness, ignorance, possessiveness, and intolerance.

**L.S.**
European opportunities at youth-fare rates

Student air fares to Europe are still in effect. Youth fares being sold in Canada, low cost flights out of New York and continued use of school charter flights all make Europe still very much available to travel minded college students- even in the face of increasing international air fares.

Case in Europe opportunities and facilities are plentiful. For example, accredited French and German language courses on U.S. branch campuses in Europe are now open to all students. A full year of college language credits can be obtained in only six weeks and anyone may audit a course without taking credits.

Wayne Co. agency offers info, advice

"I didn't know anything like this existed in Wayne County," was often the first comment from a caller. The "anything that exists" is the Wayne County Information and Referral Exchange (W.I.R.E.), established last November by the Ashland-Wayne Community Action Commission. The County-wide service (call collect 337-1126) has answered to referring questions and solving problems whenever people are not sure which agency or group can help them.

Coordinator, Mike Musy, believes W.I.R.E. has a good idea of what services exist in Wayne County and beyond. "People recognize quickly that they have a question or problem and don't know exactly who to contact. That's where we go into action." Musy stated, "We have contacted over 150 agencies and groups and our list continues to grow. We know who does what in Wayne County."

Modeling W.I.R.E. along the lines of the metropolitan newspaper quickline or action line, the office has answered questions concerning adult education, senior citizens programs, women's compensation and food stamps to name just a few. "We're trying to be both comprehensive in securing and providing information and making our service known to the public," Musy said. Even though a radio-show or newspaper feature does temporarily increase requests for help, continuing public information about the service is necessary to maintain continuing awareness and support.

The primary function of W.I.R.E. is the giving of information and advice. Many times questions are answered within the CAC office. Other times the proper referral is made. Referral can mean phoning an agency in the client's presence to arrange an appointment for him, making sure that he knows how to get there and whom to ask for. It can mean contacting an individual and helping him present his case, W.I.R.E. emphasized that keeping in touch with the inquirer until he gets the help he is looking for is one of its strongest points.

The Wayne County Information and Referral Exchange eliminates hit and miss questioning and runaround. If that is the case, which it seldom is, W.I.R.E. is the legwork. More often, however, W.I.R.E. focuses on the key problem and zeroes in to where help already exists. So the next time you need assistance give W.I.R.E. a call (337-3210).

Many hours of I.S. work destroyed by unknown vandal

Portions of a senior geology independent study as well as 170 hours of work were destroyed in Scovel Hall between Saturday evening, October 5, and Monday morning, October 7.

Jim Staub, a senior geology major, discovered 8:00 a.m., Monday morning, October 7, that some of his drafting showing cross-sections of the Killbuck valley had been shredded. The paper had been taped to a blackboard in a second-floor Scovel room.

These drawings were drawn on mylar vellum, which, according to Staub, can only be torn by making a cut with a sharp instrument. This eliminated the possibility that wind could have caused the damage.

In addition, particular data cards - those matching the torn drawings- were lifted from a pile in the room and removed.

Staub contacted Dr. Richard Gogd of the Geology Department. Gogod, after consulting with Dr. Frank Konczy, decided to take the matter to the Deans. An approach to Assistant Dean Henry Copeland, a report was filed with the Security Office and the Wooster Police Department. audits are now investigating the destruction.

Vampires back

The Bloodmobile returns to the College next Thursday, October 31, from 10:00 am to 4:00 pm in the parking lot. The newest and cutest donors will also be accepted. Donors should report to Westminister Church House.
Eight pool, six team records fall

**Denison slides by, 58-55**

by Janet Smeltz

All kinds of records were broken in last Saturday’s home swim meet between the women of Wooster and Denison. The Scotties lost by three, 58-55, in their first outing of the season, a meet marked by outstanding performances from both teams.

A total of eight pool records, including six Wooster team records, were broken in this contest. Reports a proud Coach Nichols, “The kids rallied to the competition, and some of them swam better than ever in their lives!” Indication of such efforts, plus the overall strength of Denison, can be seen in the fact that even when Wooster swimmers broke school and pool records, the women were still only coming in second and third to Denison.

Wooster wins came in the 50 yard backstroke, the 50 yard butterfly and 100 yard fly, the 100 yard backstroke, and the 200 yard freestyle relay. The entire Wooster team saw some action, both competitively and through exhibition swimming.

Wooster record-breakers included the relay team of Dale Kennedy, Katy Maldonado, Nancy Luger and Cecily Sprouse, who broke the Scotties’ best relay time—good for a second place to Denison. Liz Larcom threw out the next school record, and grabbed a second on the 100 yard individual medley. Swimmers Dale Kennedy and Nancy Luger won both their events while breaking records, Dale in the 50 and 100 yard backstroke and Nancy in the 50 and 100 yard fly.

As far as Coach Nichols was concerned, this is one of the best meets that will ever be held for women in the Wooster pool. “I am really pleased. As they did quite well, I didn’t think we’d go this fast, but I did say we were ready, so I should’ve known.” Scottie strength was definitely tested in this first meet and all those shattered records are a witness to that!

The after second home meet, held against Wittenberg last Tuesday, the Scotties dunked their opponents by a devartating 70-34 score. Three of those newly-made records were shattered by the relay team of Dale Kennedy, Katy Maldonado, Nancy Luger and Cecily Sprouse bettered their time; Liz Larcom’s second-place time in the 100 yard backstroke was her fastest yet; and Katy Maldonado, swimming in the 100 yard breaststroke event, established a new pool and school record.

Out of 12 events in the Wittenberg meet, the Scotties took first place in eight, and Wittenberg won the diving competition also. With the 100 yard individual medley, the 50 yard freestyle and the 100 yard backstroke, Wittenberg’s star diver, Kathy Copelle, placed first in the diving and even scored the perfect mark of six on one dive.

Coach Nichols was quite impressed with swimmers Luger, Kennedy, and Larcom, because their times were better than or close to their Denison times, “They didn’t slack off,” remarked the coach, “This proves these other times weren’t flukes, and that means a lot.”

Sophomore Katy Maldonado was commended by Ms. Nichols for her improvement in the past few days. “Katy was definitely pushing,” and her new record is an indication of that. The 1974 swimming Scotties are certainly a determined lot.

Unbeaten teams play OWU

Hockey takes three

by Janet Smeltz

The chance to see Wooster’s unbeaten team in action comes this weekend as the Scotties finally are scheduled on the home court. Varsity, with a current record of 4-0, takes on Oberlin today at 4:00 p.m. and Ohio Wesleyan tomorrow at 3:50. The junior varsity, sporting a 2-0 record, gets its share of the action tomorrow at 10 a.m. In addition, a Varsity vs. JV contest, an outstanding game from the start, was played last weekend.

Outstanding performances in the Ashland game came from goalie Tracey Chambers, who was shot on 15 times and displayed amazing stops and long clears in her first real test of the season, Sophomore Janell Brown also did well as sweeper fullback in her first varsity game. Varsity and JV both travelled to Oberlin last Saturday, bringing home a double victory. The JV won 9-0 in tiebreaker action the same way they won their last game—a 13-0 upset at Oberlin. The Scotties’ Varsity wins were 5-0 over Miami and 5-0 over Wooster.

The Scotties have played well this season and are expected to come out on top in this weekend’s games.

Mary Jane and Betsy were able to score on the Oberlin goalie, and the varsity raced up a 4-0 victory over a much-improved Oberlin team. Of note is the fact that Wooster’s first two shots on goal were both Scottie scores—with two minutes gone, Marit Keiser put one in off a four-man rush and then two minutes later, Cindy Hastings assisted Marjo Forbush on a wing-to-wing pass across the goal. The first half was predominately Wooster-controlled, although aggressive Oberlin did score on their sixth attempt after 23 minutes of play. Melinda Weaver’s score closed out the first half, once again using the total offensive rush to score.

Half two was a seesaw battle until Oberlin scored with two minutes to go. Not to be outdone, co-captain Melinda Weaver again found her range and scored with an assist from Brenda White to put Wooster ahead, 4-2, the final score.

The Ohio University-Wooster game is always a fast-moving and exciting game. This year the meet was generally COW controlled. The only first-half score came from co-captain Brenda Meese, who flicked the ball past OU’s goalie during a penalty corner.

Gathering momentum in the second half, Marit Keiser and Brenda Meese shared a goal, then Melinda Weaver added her score one and one-half minutes later off a “pinball machine” play, a Beth Hastings to Marit Keiser to Melinda Weaver pass, with five minutes remaining OU mounted a monumental offensive attack on goalie Chambers, and were able to score of a rebound from an attempted clear. Wooster’s last score came on a “picture play,” a perfect cross-the-goal-pass from Beth Hastings to Marjo Forbush, Sisters Beth and Cindy Hastings played their best game of the season in that OU contest, which the Scotties won, 4-1.

Wooster only has three home games this year, and two will be played this weekend at home.

---

Betsy White moves against Ashland.
Gridders drop 27-7 decision to Heidelberg

by Glenn Forbes

A demoralized Fighting Scot football team gave up 71 points in the second half during a 97-7 loss to Heidelberg last Saturday. A combination of a bad field and rain made conditions miserable for Heidelberg’s Homecoming and the Scots emerged from the dressing room eager to play the role of spoilers.

The Scots jumped out into the lead late in the first quarter. A pass interception gave Wooster the ball on their own thirty. On second and eleven quarterback Jim Breasi passed to Jim Gerard, who rambled all the way to the Heidelberg nine, leaving several defenders victim to excellent moves. Three plays later the Scots scored on a pass from Breasi to Tim Price. The extra point then made the score Wooster 7, Heidelberg 0.

At the beginning of the second quarter Wooster seemed to be dominating the game. But then a roughing the kicker penalty with about 11 minutes to go gave Heidelberg new life and they proceeded to march down the field and tie the score. A field goal late in the second period gave Heidelberg a 10-7 lead at halftime.

The third quarter was a defensive struggle until a very questionable pass interference call gave Heidelberg the ball on the Wooster one. The score was soon 17-7. That touchdown seemed to demoralize the Scots as from then on they played well below their potential. Heidelberg added a field goal late in the fourth quarter and a 74-yard interception return by Dave True with 2:11 left to go in the game put it out of reach for the Scots.

The score 27-7, though, is not really representative of the closeness of the game. Heidelberg did not dominate the play. They chalked up only 13 first downs to the Scots’ 10, and only 316 total yards to the Scots’ 300.

The Scots’ air attack was once again potent, 223 yards worth, and Tom Grippa’s performance seemed to have given Wooster much-needed outside running threat. The Scots’ pass defense was again impressive, despite the ineffectiveness of the pass rush, coming up with three interceptions. Against the rush, though, the Scots had trouble stopping Heidelberg’s draw play which consistently gained the Student Prince important yardage.

Jamie Melvin showed a strong arm but lack of experience, completing eight of 14 passes for 71 yards, but also giving up two interceptions. Jon Breasi finished seven for 15, 154 yards, one interception, Scot quarterbacks, however, did not do all the passing. Punter Pete Moore threw two passes on fake punt attempts and completed them both.

This week in pro football

by Jon Hull

Last week’s 10-3 record brings my season slate to 45-10-1, for a percentage of 80%. This week the NFL offers some very big games. There should be quite an exciting week in the NFL, so here we go.

ALANTA OVER NEW ORLEANS,...Even though the Falcons have yet to put it together, the Saints inability to win on the road should mean a rematch win for Atlanta.

THE NEW YORK JETS over BALTIMORE,...The Jets looked horrible last week while Baltimore had their best game of the season. However, I cannot see Joe Namath having two off weeks in a row, especially with the Colts defense. (A rematch of Super Bowl III? HAI!)

BUFFALO over NEW ENGLAND,...This is one of the tough ones. Nevertheless I see the home field advantage as the key here for the underrated Bills team.

OAKLAND over CINCINNATI,...I think that last week’s close call for the Raiders was just overconfidence, I do not see them taking the Bengals lightly, and I still remember that Steelers game.

PITTSBURGH over CLEVELAND,...No way this time Browns.

DALLAS over PHILADELPHIA,...The Cowboys tough luck string is due to end and they have the better team. This one should be a good one to watch.

DENVER over SAN DIEGO,...The Broncos are in a must win situation and so will not be taking the Chargers lightly enough for an upset.

MINNESOTA over DETROIT,...How many in a row will this be for the Vikings over the Lions? 14?

ST. LOUIS over HOUSTON,...The Oilers have upset potential at home, but what I said about New England last week applies here also.

MIAMI over KANSAS CITY,...A must game for each team, but the Dolphins are home and that makes all the difference.

LOS ANGELES over SAN FRANCISCO,...Good teams get upset, but championship teams rebound and that is what the Rams should do against a weak 49er team. This will not be one for the sidelines.

WASHINGTON over THE NEW YORK GIANTS,...The Redskins have found themselves and the Giants are in their mid-season form,...pistil,

In the Monday night game,...I must pick CHICAGO to upset GREEN BAY,...The Bears have been the spread every week and I can see them laying in wait for the archrival Packers who could suffer a letdown after last week’s upset. Also it is at Chicago and Monday night has a way with close and surprising football games.

Although neither attempt got the Scots a first down, future Scot opponents will have to be wary of Moore. The Scots will travel to Marietta without the services of Jim Breasi, injured in the fourth quarter against Heidelberg, and have to rely on Jamie Melvin to handle the quarterbacking.

Wooster booters lose heartbreaker to Bowling Green on penalty kick

by Dave Koppenbauer

The Wooster soccer team traveled to Bowling Green Saturday, and lost a close match, 1-0, on a judgement by the official. They travel to Granville to meet DeSales tomorrow, then will return to Wooster for a three-game slate.

In the first half at Bowling Green, neither team scored or even took charge. The action was even, with the Falcons controlling the offense, the other way, and the scene was a stalemate, the two teams fought to keep each other on the edge.

At the 16th minute, after a fast break, Tom Kasembe was attacking the Falcon goal. He had beaten several defenders, but Glen Jost threw him an elbow and Kasembe sprawled to the turf. Kasembe was removed from the game, but walked off on his own power.

Late in the half, the Falcons' midfielders Craig Teseler broke his glasses, and action was stopped as he gathered up the pieces. With only minutes left in the half, Kasembe maneuvered his way past defenders and rocketed a shot off the goalie's chest. It was as close as either team came to a goal in the first half.

The second half saw Bowling Green's Craig Teseler continue the game. Only a few minutes into the half, he kicked it between the goals, but it was recovered and remained in the game. The ball was passed to Tom Dorey, the Falcon goalkeeper, charged out towards him, Sam Booted, and the ball ricocheted off Dorey, high into the air. Freshman Matt Lawrie saw his chance, as there was no one tending the goal, but his header sailed over the crossbar.

Bowling Green soon began to dominate the game, controlling the play and breaking the Wooster driving offense, the defense, not scoring.

The tension was ever increasing, and it became apparent that one goal would probably settle the affair. This is exactly what happened, with 8:47 gone in the half, the Falcons of Bowling Green made a breakaway and was dribbled into the goal. Todd Merten, Chris Ighodalo made an attempt to stop him with a sliding tackle, in the official's opinion Chris got the ball before the man and was called for tripping. Bowling Green was awarded a penalty kick and the ball took place in the box. But Louis took the kick and Phil Lincoln, Scott goalie, almost stopped the goal, reacting with cat-like quickness he got a hand on the shot but not enough to stop it.

Lincoln played an excellent game, filling in for injury victim Horrie Cohen. Phil brought no usual goals for the JV team before being moved up this past week to varsity, he had ten saves for the game.

Injured Soot players gave the Wooster bench the appearance of a hospital ward, Cohen and Danny Hayba were both in attendance, on crutches, it was discovered after he had walked on it for a week that Cohen's foot had been broken in the Ashland game. Hayba was the victim of a knee operation one week before the season opened, both out for the year.

The home team was woosled by the Wooster cheerleaders, the band, the student body, and the university leadership.

The Wooster band, the cheerleaders, and the students are looking forward to their next home game, against Richland Tuesday, Oct. 16 at 4:00 p.m. at the Wooster Athletic Complex.

Harriers second in tri-meet

This past weekend, the College of Wooster's cross-country team ran its third home meet. In past weeks, the team has run in the OAC relays and various dual meets. This past weekend, the meet was against Muskingum and Kenyon, won by Muskingum with five strong runners in the top ten.

Wooster was led by Rich Day, as co-captain of the team, who ran a 27:49, his third best time, for second place and was followed by freshman Joseph Williams in fifth place, Doug Murphy, Forrest Merten and Leon Ostroder ran well for Wooster as did freshman Ralph Hetten, Brian Voza, and Charlie Peppard, Times for all teams have improved with each meet and the team should continue to gain strength. Unfortunately, two of the teams strongest members were lost early in the season, co-captain Dave Brown and freshman Bill Reedly.

This weekend the team will be at Ohio Wesleyan for the American Athletic Association meet Oct. 23 there will be a home meet against Malone, Meeks begin behind Babcock.

'W' Club formed

The athletes of the College of Wooster have formed a new organization called the "W" Club.

The purpose of the club is to unity the athletes of the various sports under a common cause. Also, the club is a way to further develop the role of the athlete on the College of Wooster campus.

The main goal of the "W" Club this year is to review the present award system and possibly establish an entirely new policy of providing award $s for all varsity sports. In addition, the "W" Club will be helping in the recruiting of High School athletes, raising funds for its various projects, and other worthwhile ventures.

The organization is open to any undergraduate Letterwriters. The group encourages participation of athletes from all varsity sports, since the entire athletic program at the College of Wooster will benefit. A few votes alone cannot be heard, but by uniting together we can vote our opinions and accomplish our goals.

For any further information contact one of the officers: Grant Relie (President), Bill McMillan (Vice Pres.), Jim Robinson (Secretary), and Bruce Schiller (Treasurer).

13,979 students

Since the first class graduated in 1871, a total of 13,979 students have graduated from the College.
