Many of the men who have been stationed in England earlier this year will be in attendance at the Wooster College Square Dances tonight.

If the Wooster Record was printed at home, the inky blackness of the ink would be closer to the natural light than the white pages in the classroom. The Wooster Record is a weekly newspaper published by the students of Wooster College in Wooster, Ohio. It covers local news, campus events, and other topics of interest to the student body. The newspaper is known for its lively and opinionated tone, and it has served as an important forum for student expression and debate since its founding in 1897.

Back on campus for another year’s try at the Phi Beta Key, we won’t feel quite so pleased, perhaps, to remember what it was that made us flake here in the first instance. It was probably the first voice to be heard by the consecutive group of students in the first year that our generation of students will ever hear. It was a voice of warning and about what the future held in store for them in the respect to their college career. We hope that the warning and the advice of the present generation of students may be heeded by the few who will answer the call this fall. We hope that the advice and the warning will be received with due respect and that it will be heeded.

The Voice

The voice of the present generation is probably the most important voice in the world today. It is the voice of the future. It is the voice of the generation that will have to face the problems of the world as it is today. It is the voice of the generation that will have to shape the course of events in the world as it is today.

The voice of the present generation is also the voice of the past. It is the voice of the generation that has gone before. It is the voice of the generation that has shaped the course of events in the world as it is today.

The voice of the present generation is also the voice of the future. It is the voice of the generation that will shape the course of events in the world as it is today. It is the voice of the generation that will have to face the problems of the world as it is today.

The voice of the present generation is therefore the voice that we must listen to, and the voice that we must heed. It is the voice of the future, the voice of the past, and the voice of the future.
