Double Barrered Sabotage

About a week ago an extremely ingenious Fred played a dual simultaneously at the two basic concepts for which Wooster has tradition - science and religion. (Wooster's motto: Science and religion, or six feet.) The perpetration of this double sabotage goes far, no doubt greatly assisted by the present social upheaval. The complex problem is best illustrated by the paradoxical statement of this week's edition of the Wooster Voice: "We have no faculty, nor do we have any students."

The release of two torpedoes in the channel was acted upon by both audience and speakers. If, as many taste these actions were prompted by a political group, desiring to discourage the extension of the imperialist policy of Wooster, it is likely that the result of this operation was not anticipated by the authors of the device. The Wooster community was taken by surprise and was left to grapple with the problem of how to proceed. 

Note on Pledging

From the general conversation picked up around the floor after the pledging day, it was apparent that some of the pledgers were somewhat disturbed by the results. They had not been forewarned that the pledges might be considered a form of capital punishment. Pledgers have been known to be sacrificed for various offenses, such as failure to meet the required standards of deportment, or for personal reasons such as being too tall, too short, or too fat.
