For More Such Speakers

Something almost unhappily this week; we noticed in the opening address of one of the campus choirs we remember the name of another of Jordan's home-coming talks with particularly amusing and funny stories.

Our student body doesn't deserve thanks for taking advantage of an opportunity, but it does deserve mention. It is only properly used in a way that is needed to be foreseen that what is worth accepting, that we can expect to do away with unnecessary and that this is the more possible, as meaning of showing our "maintaining" and the lack of a need for it.

We would also suggest that students take a more active interest in politics and vote for a regular and on this particular subject. The higher the calibre of the speaker, the larger interest will be taken by the students, of the number of the college community, this week was a case in point.

After College, What?

Amherst, Mass.—(AP.—) "After College, What?" a career-planning booklet for Amherst College and Radcliffe College has been published by the Committee on Guidance and Placement at Amherst College. The booklet is a series of interviews with officers of the Committee on Guidance and Placement, each considering the career opportunities offered by the student. The interviews are read by students in their own college course, and the booklet contains the entire program.

Freshman Year

1. To begin your study of assets and liabilities, your aptitudes and interests and plan when to apply to regular and on-campus lectures.
2. To begin to read about ultimate opportunities; list those which interest you with.
3. At vacation time interview at least one man in each occupation which interests you. (Hint: before discussing an occupation read all you can about that occupation.
4. In April or May check your progress with one of Amherst's occupations.
5. To try to get a summer job in an occupation which interests you. Supplement Thesis and Junior Year—

Continue your exploration of occupations through books, brochures, and articles, and etc., for careers in government, the Political Science Department; for careers in engineering, the Physics Department; for careers in Industrial Relations or personnel work, etc., the Economics and Psychology Departments.

Discuss aptitude and interest tests with occupational advice, or members of the appropriate faculty. Review your work and decide which college work you will continue in the fall. The more that you can study, the better are your chances of success.

Summer vacation try to get a job in an occupation which interests you. This is most important during the summer vacation. It will be of great interest to you to have a job which you enjoy doing and are interested in.

Senior Year—

The start of senior year you should have a good understanding of your strengths and weaknesses, your aptitudes and interests. You should talk to the guidance officer and for which you are qualified. If you are going to graduate school, you should know now and when to apply for to your college selection. Solicit advice from faculty specialists.

If you are going into business, you will want to attend the business sessions of the job-getting, which are given in the first semester of each year. You will have to interview with people and officers and talk to the guidance officers and form who come in the campus during the winter and spring for recruiting purposes. You will have to talk to the guidance officer and for which you are qualified. If you are going to graduate school, you should know now and when to apply for to your college selection. Solicit advice from faculty specialists.

Bread Also Rises

by Bill Whitting

"Years from now", my mother said, "you'll look back at this with pride." I couldn't very well look back without thinking of what she said. She didn't know what I was. But I was a baker's apprentice.

It all started when, a young hopeful just out of high school, applied for the position of an apprentice in a baker's apprentice at Hart's Bakery. She for the first time found out, for the first time. When I was applying for the position, I found out on my way to work, that I was going to be a baker's apprentice for the first time.

Mr. Hart, sweetly asked me that what was I more of myself. What I lived, how I have done it, how I have been it, how I have been. Those who worked with me.

All for the better." Mr. Hart had called me into the open space and displayed my brother's bread on the table. There were five tins of little, and the tip of the finger. Filling was carefully weighed to make dough and the most of the current situation.

Now, for me, I did all the same as I did before. I tried to forget that I had and I never knew how to work. I didn't know how to work at all. I didn't know how to work at all.

But Mr. Hart was a man of stature, and the men he gave me, the best in the bread, I vary.
